more
about our
Warrior
Semi Electric
Stackers
01621 786630

Often a fully powered counterbalanced truck is overkill for many applications so a small semi electric counterbalanced stacker is needed. The **WARRIOR** Semi Electric Counterbalanced Stacker may be the solution...

The **WARRIOR** Semi Electric Counterbalanced Stacker is ideal in applications where the type of pallet used cannot be guaranteed. In many instances firms have a need to handle not just open ended pallets like euro pallets but a myriad of different types with full perimeter bottom boards and lateral bearers causing problems for traditional wrap over fork trucks.

General workshop handling tasks are also undertaken more easily if you can use a machine without any support or straddle legs which can often become a nuisance when trying to overcome a handling issue.

WARRIOR Semi Electric Counterbalanced Stacker

- ▶ Basic capacity of 500kg @ 400mm load centre
- ▶ Lift heights up to 3m.
- ▶ Steering handle
- ▶ Brake
- ▶ Built-in battery charger
- ▶ Ex stock delivery of most popular models.

WARRIOR Easyroller

The **WARRIOR** Easyroller has been designed to assist the operator by utilising leverage from the handle and transferring the effort to the main steer wheels. This allows the operator to push down on the handle and begin to move the truck with a much lesser effort than would normally be required. The controllability is such that you can even climb over small lips which would cause a normal loaded pallet truck a problem.

Direction is controlled by a foot pedal. Movement is actuated utilising a direct mechanical drive system as opposed to a friction system. The system can also be disengaged and then used as a conventional pallet truck.

This system can be retro fitted to many of our other non-standard pallet trucks.

WARRIOR York Lifter YM250

Designed to overcome lifting problems caused by nesting roll containers with fold up bottoms!

Typical of the service we can offer....

We can review, design and implement bespoke handling solutions to overcome all types of handling challenges.
