**Cantilever racking - safe and neat storage, especially suited for long products**

Designed and manufactured to individual requirements. Robust design to cope with arduous environments. Maximise the use of your valuable floor space.

**STANDARD FEATURES**

- Arms positively secured in position using two high tensile, zinc plated bolts
- Arms adjustable on a typical pitch of 150mm (can vary if required)
- All upright and base sections are manufactured from hot rolled universal beam sections
- Arms manufactured from universal beam or rectangular hollow sections
- Racks are available in any colour, although black is standard

We provide exceptionally high levels of customer service and we will guide you through all the stages of your purchase.

- Rack heights of up to 10 metres
- Arm loads of up to 5 tonnes
