Effective Affordable Economic

Pedestrian **BARRIER**

The Pedestrian IntaLockBarrier® system is a multi-purpose post and rail system that offers highly effective impact protection together with low cost installation and maintenance. Once the post bases have been anchored a unique fastening device interlocks the posts and rails without the need for bolts, screws or welding.

Manufactured from extruded polypropylene the barrier offers high impact deflection and absorption properties. It also means the barrier is impervious to most environmental conditions, will not rust or rot and requires no painting making it ideal for both internal and external use. Recommended post fixing bolts to provide maximum installation integrity are included as standard with the barrier.

One of the most significant benefits of the assembled barrier is its 'forgiving' nature to impact. On impact the barrier components will bend and after the source of impact is removed the components will return to their original shape and form rather than remain permanently distorted or broken.

The barrier has been designed and developed to comply with relevant safety standards and regulations.

AWKWARD!**

WALKWAYS

CAR PARKS

LOADING BAYS

Up to 65% cheaper than barriers made from more traditional materials

Double-swing action or sliding access gates are available allowing access where it is not desirable to have gaps in a barrier run. A range of installation accessories is also available. Recommended post fixing bolts to provide maximum installation integrity are included as standard.

Both swing and sliding gates are available in widths of 1000 and 1500mm as standard (non-standard widths are available on request).

These widths allow for gate openings of 1000, 1500, 2000, 2500 or 3000mm.

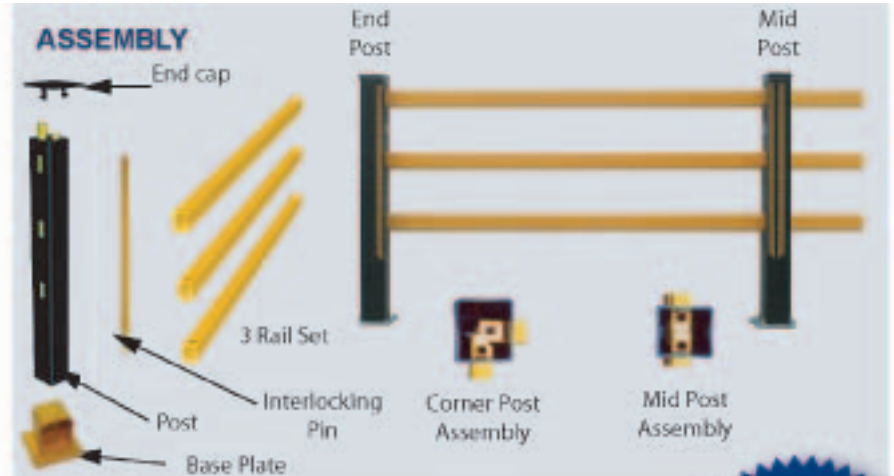

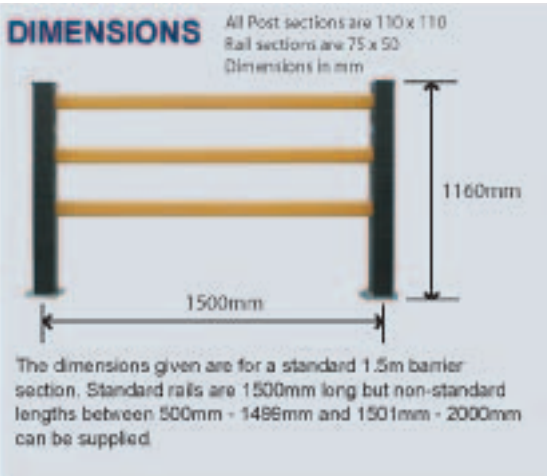

✓ **Simple installation**
✓ **Low Maintenance**
✓ **Easily repairable**

✓ **Long Lifetime**
✓ **Robust & Durable**
✓ **No Painting**

✓ **No Rusting or Rotting**
✓ **No screws or welding needed for assembly**

With many uses on industrial and commercial sites contact us to see how we can help you to offer a more cost effective solution.
