

Laptop Secure Lockers

A secure location for temporary storage

Mobile and versatile in use, laptop computers are becoming increasingly commonplace in the workplace and at school. However, their portability brings its own security problem - theft of unattended laptops can be easy and is a real concern.

We can now offer protection against laptop crime, with a purpose-designed locker unit to provide safe storage while laptops are not in use.

Strengthened door brings added security

- Light Grey RAL 7035
- Yellow RAL 1003
- Green RAL 6001
- Red RAL 3020
- Blue RAL 5002

DOOR COLOURS
Please specify door colour.
Carcase is finished Light Grey (RAL 7035).

OPTIONAL SECURITY STRAP

For added security a full length steel strap is available to cover the locks. This is secured by a padlock fitting (not supplied) to the front face of the locker. When not in use the strap is 'parked' on the right or left side of the locker as preferred. (default is the left side - please state the right side if required when ordering).

BioCote is the proven, patent protected coating which is incorporated into the paint finish and inhibits the growth of potentially lethal bacteria and fungi. This reduces the risk of cross-contamination from surfaces with high contact frequency.

Laptop LOCKERS

Features

Lockers are available in 3 types:

- **15 compartments with 15 doors**
- **15 compartments with 1 door**
(15 compartment lockers accept laptops without carry cases).
- **10 compartment with 10 doors**
(capable of storing laptops with carry cases).
- **3 point locking mechanism for single door unit**
- **Robust, all-steel construction.**
- **15 compartment lockers have a compact 'footprint' of only 381 x 457mm.**
(10 person unit is 457 x 457mm)
- **Alternative of ASSA deadlock fitting for extra security.**
- **Accessible 1778mm overall height.**
- **Lockers can be fitted with sloping tops, to prevent litter being left on top of lockers and to make cleaning easier.**
- **As with all other steel Moresecure lockers we supply, BioCote® Protection comes as standard. This new protective technology - an integral part of the powder coating finish - inhibits the growth of potentially harmful bacteria and fungi, reducing the risk of cross-contamination from surfaces with high contact frequency.**

OPTIONAL EXTRAS

- **Full length security strap enclosing all lock barrels.**
- **Steel anchor plates to fix cabinet to wall.**

15 compartments, each with its own key, 90mm high x 285mm wide x 425mm deep.

10 compartments, each with its own key, 175mm high x 360mm wide x 425mm deep.

15 compartments with 1 door 90mm high x 285mm wide x 425mm deep.
