

## Safety Barrier Accessories

Access Gates · Signs · Height Restrictors · Rack Protectors · Kick Plates · Safety Matting · Micro Barriers · Base Plates

### Access Gates

- Compatible for use with Pedestrian Barrier, Handrail and Traffic Barrier when fitted with Pedestrian Rail Attachment
- Swing (Double action) and Sliding options
- Standard opening sizes of 1000mm, 1500mm and 2000mm
- Can be installed in pairs to give openings to a maximum of 4000mm.
- Can be installed as part of a barrier section or as a stand-alone gate
- Single swing gates can be mounted in-line with or at right angles to a barrier section
- Non-standard sizes are optionally available

#### Options available for:

- Indicating access points for fire exits, fire or safety equipment or medical assistance. Gates supplied in fire exit green
- Limiting a swing gate action to swing in one direction only
- Securing gates in an open or closed position
- Locking gates in a closed position

### Health & Safety Signs & Signboards

- Compatible for use with Pedestrian Barrier, Handrail and Traffic Barrier when fitted with Pedestrian Rail Attachment
- All signs accredited to ISO9001 - 2000
- Signboards available for display of single or multiple message signs and charts
- Signs supplied in rigid plastic. Self adhesive signs are optionally available.
- Large standard range of commonly used signs
- Customised signs available to meet specific symbol, layout and text design requirements

#### For prominent display in a necessary or desired location of:

- Prohibition, Hazard/Warning, Mandatory, Safe Condition and Fire Equipment message signs
- Health and Safety Rules and Regulations required to be displayed by law
- Company Rules and Regulations as required to be displayed by Company Policy

THERE IS NO SPACE TOO BIG TOO SMALL OR TOO AWKWARD!

## Height Restrictors

- For use where vehicle/fork lift truck height restrictions need to be implemented
- Ideal for use in conjunction with roller shutter doors or where impact with overhead pipes, cables, air or gas supply lines presents a potential hazard
- Available with square section black standard style posts or with circular section yellow bollard style posts
- Maximum internal clearance dimensions - 4000mm wide x 2500mm high for square section standard type posts and 4000mm wide x 3500mm high for circular section bollard style posts

## Rack Upright Protectors

- Manufactured from an advanced thermoplastic material
- Meets the requirements of the latest relevant Health and Safety guidelines.
- Available for a range of column sizes and specifications
- Easy installation. Clip on fitting securely gripping the column with no separate fasteners required
- Effective in temperatures down to -40°C
- Supplied in recognised safety colours, black and yellow
- Passes frontal and side impact test for European Code FEM 10.2.02
- Low purchase and replacement costs

## Racking UK

Racking UK is a family company supplying, installing and repairing all makes and types of storage and workplace equipment for almost 40 years.

Stephen Gray began installing shelving and racking systems in 1970. Initially providing an installation & repair service for manufacturers and trade distributors Racking UK has grown to establish a varied and diverse range of satisfied clients in all types of business.

After many, many years designing, installing and reorganising storage and warehouse systems we have a unique experience in creating innovative solutions for all types of business.

Racking UK modern approach and flexible and cost efficient storage solutions help you manage your business and budget.

- **FANTASTIC PRODUCTS**
- **A MODERN APPROACH TO SERVICE**
- **TRADITIONAL BUSINESS PRINCIPLES**

### Kick Plates

- Compatible for use with Pedestrian Barrier and Handrail
- To prevent low level access (eg FLT forks, hand pallet trucks) passing under a barrier for protection of walls, structures and equipment
- To prevent items (eg tools, equipment, goods) falling from height when a barrier is installed along a raised edge (eg mezzanine floor, loading bay)
- Not retrofittable, must be specified with relevant barrier system at time of purchase

### Safety Matting

- Provides a non-slip working surface
- Cushions impact of falling objects, personnel or equipment
- Assembled from lock together tiles to provide coverage over a required work area
- Provides fall height impact protection certified in accordance with EN1177
- 0.5m<sup>2</sup> tile size. Standard tile is 40mm thick providing impact protection for a fall height of 1.0m
- Optional tile thicknesses available to provide impact protection for fall heights up to 3.0m
- Tiles available in yellow and black to provide a chequered pattern when assembled for high visibility and potential hazard indication
- Sloped edge tiles available to remove trip hazards at matting edges and allow access of wheeled equipment

### Value for Money Quality

Principally products we offer are manufactured in EU-based factories. Products that are strong, durable and made from EU-sourced materials and components. Where necessary products conform to EU standards.

We provide a wide range of quality systems designed to suit your individual requirements that fit perfectly into your work space. Classic quality systems that are built to last, look good and operate superbly.

All products are covered by manufacturer's warranty.

### Customer Service

We will provide a \*free preliminary visit to your premises, together with a no obligation quotation to offer our advice in selecting the right product for your requirements.

\*Selected areas only.

### Micro Barrier

- Low level (overall height 260mm) modular barrier system for installation where material or personnel movement is undertaken by manually operated devices, such as hand pallet trucks or trolleys.
- Provides protection for walls and equipment such as supermarket freezers and chilled storage areas
- Ideal for use in retail storage and movement areas and hospital corridors
- Can be used as a handrail when installed horizontally on to a vertical wall or other surface

### Base Plates and Fixings

Option available for assembly and erection of temporary or moveable barrier sections

- Compatible for use with Pedestrian Barrier, Handrail Traffic Barrier and Rack End Barrier
- Circular plastic base plate, attaches directly to standard barrier post assembly
- Two size options available. Size required determined by barrier type and stability required.
- Plastic material ideal for use where corrosive materials may be present

### Upgrades available to:

- Stainless steel base plates and fixings for installation in corrosive or potential corrosive environments (eg seashore and chemical production or storage environments)
- Heavy-duty base plates and fixings for installation in areas where frequent and/or increased impact is likely to be present

### Bespoke Solutions

If you can't find exactly what you need on our website [www.racking-uk.com](http://www.racking-uk.com), we have the experience to design and manufacture a custom-made solution for your specific requirements...perfectly.

Everyone is responsible to ensure that the Health and Safety of employees and co-workers is considered of the utmost importance.

We have many years experience & a wide practical knowledge in repair and maintenance of storage and warehouse systems.

Our fully experienced and insured teams are available for installing, dismantling and rearranging all makes and types of storage systems.

We can relocate systems to different locations, providing supplementary materials or purchasing redundant materials as necessary.

We provide a swift and cost-effective repair service to maintain statutory safety requirements for you within the framework of The Health and Safety at Work Act.

If you are in any doubt whatsoever about the current safe working condition and reliability of your storage equipment please contact us straight away to discuss your requirements.

*It is our declared aim to deliver on time and within budget... every time!*
