Racking UK

Racking UK is a family company supplying, installing and repairing all makes and types of storage and workplace equipment for almost 40 years.

Stephen Gray began installing shelving and racking systems in 1970. Initially providing an installation & repair service for manufacturers and trade distributors Racking UK has grown to establish a varied and diverse range of satisfied clients in all types of business.

After many, many years designing, installing and reorganising storage and warehouse systems we have a unique experience in creating innovative solutions for all types of business.

Racking UK modern approach and flexible and cost efficient storage solutions help you manage your business and budget.

- **FANTASTIC PRODUCTS**
- **A MODERN APPROACH TO SERVICE**
- **TRADITIONAL BUSINESS PRINCIPLES**

Value for Money Quality

Principally products we offer are manufactured in EU-based factories. Products that are strong, durable and made from EU-sourced materials and components. Where necessary products conform to EU standards.

We provide a wide range of quality systems designed to suit your individual requirements that fit perfectly into your work space. Classic quality systems that are built to last, look good and operate superbly.

All products are covered by manufacturer's warranty.

Customer Service

We will provide a *free preliminary visit to your premises, together with a no obligation quotation to offer our advice in selecting the right product for your requirements.

*Selected areas only.

Bespoke Solutions

If you can't find exactly what you need on our website www.racking-uk.com, we have the experience to design and manufacture a custom-made solution for your specific requirements...perfectly.

Everyone is responsible to ensure that the Health and Safety of employees and co-workers is considered of the utmost importance.

We have many years experience & a wide practical knowledge in repair and maintenance of storage and warehouse systems.

Our fully experienced and insured teams are available for installing, dismantling and rearranging all makes and types of storage systems.

We can relocate systems to different locations, providing supplementary materials or purchasing redundant materials as necessary.

We provide a swift and cost-effective repair service to maintain statutory safety requirements for you within the framework of The Health and Safety at Work Act.

If you are in any doubt whatsoever about the current safe working condition and reliability of your storage equipment please contact us straight away to discuss your requirements.

It is our declared aim to deliver on time and within budget... every time!

THERE IS NO SPACE TOO BIG OR TOO SMALL OR TOO AWKWARD!

Safe working load for operation on a staircase is 50KG

Sack Truck - Star Wheel

This truck has been designed to aid the mounting of kerbs, doorsteps and stairs - if used on a staircase it is safer if two people operate it. The outer wheel revolves on a centre axle allowing the smaller wheels around the outside to roll on to progressive stair risers, this ensures a smoother ride for the load. The safe working load on the stairs is only 50kg as the effort required to pull the truck up, or more importantly hold it on the way down, would be too much for one man to handle safely. The carrying capacity on level ground is greater.

	CODE	HEIGHT	WIDTH	SHOE LENGTH	SHOE WIDTH	WEIGHT	WHEELS	CARRYING CAPACITY
F	SAS100	1065mm	545mm	470mm	320mm	13Kg	160mm plastic centre, rubber tyre	100Kg

Options - Castors

The standard truck has 200mm castors in a two fixed, two swivel configuration, with a tyre that will move easily with a maximum load of 350Kg. If you require a more manoeuvrable truck, then the all swivel configuration (SS) is the best option. Either castor configuration can be used with a semi elastic rubber tyre (E) this will move easily with a load of 500Kg. A brake (B) can be added to the swivel castors. Add the Castors Options required to the Product Code, adding the prices together for a total product price.

Trolleys - Shelf

The Shelf Trolleys have a fully welded framework with robust mild steel sheet shelves and are finished to a very high standard with a polyester powder paint finish. The 125mm roller bearing, rubber tyre, all swivel castors give the trolley great manoeuvrability and a carrying capacity of 200Kg.

The trays on all the SHF products are 40mm deep, except on SHF202 which are 90mm deep with one open side.

Turntable Trucks - Mesh Box

The Mesh Box Turntable Trucks have a framework which is manufactured out of formed mild steel sheet and is filled with 50mm weld mesh. Two gate options are available - a lift and a half

hinged side. The hinges and catches are located within the framework ensuring a smooth side thus reducing the chance of damage to walls and doorways.

One Tonne Trailers - Platform

The one tonne trailers are based on our turntable truck construction, but have a ball bearing steering unit. The unit handles the stresses that power towing creates. The tow bar has

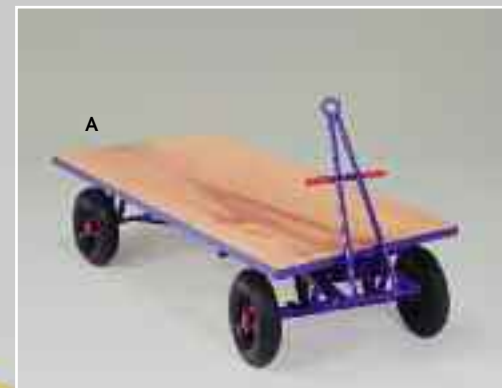

a 100mm diameter ring plus a handle for safe hitching. The units are manufactured in bulk thereby offering an economic solution to your moving problem.

One Tonne Trailers - Mesh Box

The Mesh Box Trailers have a framework which is manufactured out of formed mild steel sheet and is filled with 50 mm weld mesh. Two gate options are available - a lift and a half hinged gate.

The hinges and catches are located within the framework ensuring a smooth side thus reducing the chance of damage to walls and doorways.

Safety Steps - Light

The two tread Light Step has a steadying post, whilst the three and four tread models have full handrails. The steps are easy to move around on the four spring loaded castors which retract into

steel cups when the unit is stepped on. The steel cups protect office furniture and shelving from damage, when moving the steps around.

Safety Steps - Light Industrial

The Light Industrial Steps have a heavy duty 50mm rubber tyre spring loaded castor, which enables the steps to be used in warehouses, and factories where greater distances are travelled

over rougher floor conditions. The framework is designed to provide stability when in use and the full handrail gives a feeling of security, when climbing or standing on the step.

ASK US TO QUOTE

Safety Step - High

This range of High Steps are our most popular with the top tread heights covering most applications. The steps have a robust fully welded mild steel square tube framework, with tubular handles all round and to increase the stability that the 762mm wide treads give to the steps, we slope out the sides and end frame from the platform. If the steps are being used in a narrow aisle, we can manufacture to suit your individual requirement. The steps fold to

allow entry into areas with restricted access and for ease of transport, full instructions are attached to the framework. The steps move easily on 200mm nylon centre, rubber tyre wheels at the high end and 100mm swivel castors mounted in a footlock at the low end. The top tread is 400mm deep. As an optional extra, a Side Lever Lock can be fitted in place of the footlock, with no extra charge.

Number of treads includes top platform. Tread depths 200mm

Options - Safety Step. We have developed a range of standard options that have been requested regularly over the years which will enable you to customise your steps without increasing the price too much.

CODE	SAFETY STEP OPTIONS
HPE	Extend the length of the Top Tread in 200mm sections, over 1000mm we will quote a special price.
SPH	A platform height that is different to the standard, this requires us to re- position every tread, which is done by hand.
HRORS	Hand rail on right side only ascending.
HROLS	Handrail on left side only ascending.
HG	Side hinged tubular gate fitted to the handrail at the foot of the steps to prevent unauthorised access.
HGP	Side hinged tubular gate fitted at the top of the steps, to increase safety on top tread.
HWSH	300mm x 500mm wide work shelf fitted to the handrail at the end of the platform. Price includes extra 200mm length to platform.
HKP	All the safety steps have a knee rail, but a 100mm high mild steel kick plate is available all round the platform.
FTLOK	200mm nylon centre wheels & 100mm nylon swivel castors in a footlock in place of the four sprung loaded castors. on the H03 & H04 models. This option offers a very stable step for working at low heights.
HL	Side lever lock in place of the footlock, H05 to H15 models only.
HPG	Side hinged tubular gate, mounted on either side or the end of the top tread. The top tread depth is increased to 600mm to allow safe opening and access. Available on H07 to H21 models only.

Tread Types

There are three types of tread available.

Work Platforms

C - Work Platforms made to order contact office for details.

Plastic - Box Trucks

From storing linen to holding rubbish our Plastic Box Trucks are perfect for all kinds of applications. The Box Trucks are tapered to allow them to nest when not in use, saving valuable storage space.

	CODE	INTERNAL LENGTH	INTERNAL WIDTH	INTERNAL HEIGHT	OVERALL HEIGHT	WHEELS	CARRYING CAPACITY
A	BPT101	915mm	610mm	610mm	760mm	100mm Nylon in a fixed frame, tilt steering	320Kg
	BPT201	1220mm	610mm	610mm	760mm	100mm Nylon in a fixed frame, tilt steering	425Kg

Plastic - Stack Nest Boxes

These boxes will nest for storage, turn them through 180 degrees and they stack. The sides and base can be solid or perforated and they are available in blue, green, red, white, and grey.

	CODE	OVERALL LENGTH	OVERALL WIDTH	OVERALL DEPTH	CAPACITY	TYPE
B	SNB001	600mm	400mm	200mm	32 litres	Solid

Light Duty Scissor Lifts

These Scissors Lifts are small and manoeuvrable on their 125mm nylon, two fixed, two swivel castors and one swivel castor has a brake. The table is raised and lowered by hydraulics, activated by a foot pedal at the handle end. The capacity of these units is 150kg.

	CODE	LENGTH	WIDTH	HANDLE HEIGHT	OVERALL L X W	RAISED HEIGHT	LOWERED HEIGHT	WEIGHT	CONSTRUCTION MATERIAL

ASK US TO QUOTE

Low Load Trailer

The trailer has been designed to carry 2 roll cages with a castor configuration that will work in confined areas. The low floor ensures easy loading via a ramp at the rear.

	CODE	OVERALL LENGTH & WIDTH	INTERNAL LENGTH & WIDTH	INTERNAL HEIGHT	RAMP LENGTH	GROUND CLEARANCE	CASTORS
A	PLL002	2163mm 1050mm	1750mm 760mm	750mm	750mm	120mm	200mm steel centre roller bearing elastic rubber tyre

Cylinder Trailer

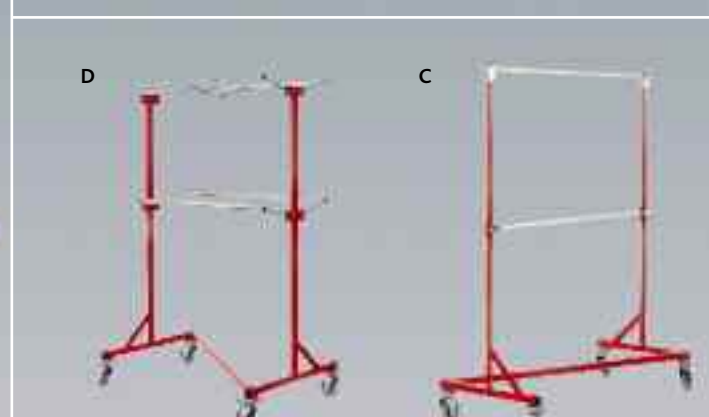

The Cylinder Trailer has a low platform with a ramp each side that ensures easy loading. The unit can be configured to carry the type and quantity of cylinders to meet your needs. 14 cylinders dividers and chains are supplied per trailer.

	CODE	OVERALL LENGTH & WIDTH	INTERNAL LENGTH & WIDTH	INTERNAL HEIGHT	RAMP LENGTH	GROUND CLEARANCE	WHEELS
B	CYT600	2250mm 890mm	1220mm 610mm	940mm	588mm	75mm	355mm steel centre roller bearing rubber tyre

Garment Rails

We have developed two Garment Rails that work successfully in the yard as in the warehouse. The Two Rail has a lower rail that drops to accommodate long items hanging from the top rail. The Four Rail allows a large volume of items to be stored and moved easily. The rails nest for storage and have buffer wheels on each corner to prevent damage to wall, doors, and fixtures. The units move on four 125mm grey non-marking swivel castors, two have brakes.

	CODE	OVERALL LENGTH	OVERALL WIDTH	TOP RAIL HEIGHT	MIDDLE RAIL HEIGHT	HANGING HEIGHT
C	CRM001	1620mm	650mm	1828mm	1030mm	800mm, 1400mm when middle rail dropped
D	CRM002	1380mm	810mm	1850mm	1120mm	700mm top rail, 860mm middle rail
