Maintenance of Racking Structures

1. Refer to supplier's drawings and/or technical data for maximum safe load.
2. DO NOT alter structure without either:
 - a) checking effects against technical data
 - b) obtaining necessary approval from supplier.
3. Instruct operators in correct use of equipment. (NOTE- damage due to impact can seriously impair safety.)
4. Conduct regular inspections to check for:
 - a) correct application and use.
 - b) loads within allowable safe limits.
 - c) accidental damage to or dislodgement of structure components.
5. Refer to relevant SEMA Codes of Practice for more detailed information.
6. If in doubt ALWAYS contact suppliers.

FOR SAFETY'S SAKE REPORT ALL RACK DAMAGE
