A vertical racking system where product is stored safely & logically at 5° angle against racking

Allows quick and easy stock selection, ideal for hand-picked items. Location size readily adjusts as stock levels vary. Sturdy bolted construction, plus simple on-site assembly.

- Arms adjustable horizontally without using tools
- Standard location depths: 450mm, 600mm or 750mm
- Rack length designed to suit your application
- Standard heights: 2m, 3m, 4m, or 5m
- Single or double sided options
- Floor rails retain stock safely
- Dividing arms painted orange for visibility

TYPICAL PRODUCTS STORED:

Aluminium bar, timber batten, copper pipe, plastic extrusion, steel conduit
