EASYSHELF PICK

Weld mesh pick panels is a mesh deck which maximises space by creating a double sided pick face from a single bay. Compatible with both boxed and step beams, this angled variation allows for easier access and a clearer view of stock.

FLAT MESH DECKS

Flat panels are robust mesh decks, designed for small parts, cartons and archive boxes. Finished with front and rear horizontal wires, ensures no sharp edges and loading ease.

ANGLE MESH DECKS

Weld mesh angle mesh deck, an alternative heavy duty storage application to our standard storage panel. Constructed with an steel angle perimeter and finished with reinforced wire mesh, to store loads in excess of 1000kgs.

WELD MESH STEP

The weld mesh step is a high-strength wire mesh deck designed for the use with step beams. Featuring an internal waterfall to match the pitch of the step creates a flush unrestricted loading level.

WELD MESH STANDARD

Weld mesh waterfall is our most versatile deck capable of being used in a range of applications from picking levels to pallet storage. Constructed from fusion welded steel and finish with mesh apertures as small as 25x25mm.
